Professional Summary

Results-driven Android Developer with 4+ years of experience building high-performance, scalable mobile applications across travel, healthcare, e-commerce, and fintech domains. Expert in Kotlin, Jetpack Compose, and Kotlin Multiplatform (KMP), delivering polished cross-platform experiences. proficient in Google Play Store publishing lifecycle, Google AdMob monetization, and AI-assisted Next development tools. Demonstrated ability to localize and scale apps to 29+ languages with 1M+ Play Store downloads. Committed to Agile/Scrum environments and delivering mobile solutions that drive measurable business growth.

Work Experience

Jun 2023 - Present.
Kochi, Kinfra Hi-Tech Park
India

Android developer Lascade LLP

- Led end-to-end development and maintenance of Flight, Hotel, and Rental Car booking applications serving customers across the USA, Europe, and the Middle East, achieving multiple app titles with 1 million+ downloads on the Google Play Store.
- Engineered full UI migration from XML Views to Jetpack Compose across 40+ screens, reducing UI code by 30% and cutting feature-delivery time by 40% within two-week Agile sprints.
- Built Kotlin Multiplatform (KMP) shared business-logic modules enabling code reuse across Android and future iOS targets, reducing duplication by approximately 35%.
- Leveraged AI development tools to generate boilerplate, refactor legacy modules, and auto-generate test scaffolding, shipping features 2x faster while maintaining rigorous review discipline.
- Established CI/CD pipeline with GitHub Actions and Fastlane, automating Play Store deployment and cutting release preparation from 2 days to under 3 hours, maintaining 99.5%+ crash-free sessions across all live titles.
- Integrated analytics and growth stack including MixPanel, Firebase Analytics, MailChimp, and OneSignal, delivering actionable funnel and retention insights to the product team.
- Managed complete Google Play Store publishing lifecycle across all titles, including app signing, staged rollouts, store list performance monitoring.
- Integrated Google AdMob across multiple apps implementing banner, interstitial, and rewarded ad formats, optimizing eCPM and fill rates for sustainable in-app ad revenue.
- Mentored junior developers on Kotlin best practices, Compose architecture, and clean-code principles, leading sprint planning and code review within Agile/Scrum cycles.

Dec 2021 - Jun 2023
Kozhikode, Cyberpark,
india

Junior Android developer Meridian IT solutions

- Built Android app for real-time food ordering and kitchen management for Paragon Group restaurants across the UAE, featuring Arabic localisation and POS-linked order flow.

- Developed a comprehensive healthcare app with appointment booking, HD video consultations, online payments, and patient health records, delivered to production within a 3-month window.
- Designed and launched e-commerce platform from scratch for traditional Middle Eastern artisan products, implementing product catalogue, cart, Stripe payments, and Firebase push notifications.
- Introduced MVVM + Repository pattern and Hilt DI across all three products, reducing boilerplate by ~25% and improving code testability.

Sep 2021 - Nov 2021
Kochi, Kerala - India

Android Developer Intern Zoope Technologies

- Developed and delivered assigned Android feature modules using Kotlin and Jetpack components under senior guidance, gaining production experience with REST API integration and lifecycle-aware ViewModels.

Notable Achievements

- ✓ Engineered full UI migration from XML Views to Jetpack Compose across 40+ screens, reducing UI code by 30% and cutting feature-delivery time by 40% within two-week Agile sprints.
- ✓ Built Kotlin Multiplatform (KMP) shared business-logic modules enabling code reuse across Android and future iOS targets, reducing duplication by approximately 35%.
- ✓ Established CI/CD pipeline with GitHub Actions and Fastlane, automating Play Store deployment and cutting release preparation from 2 days to under 3 hours, maintaining 99.5%+ crash-free sessions.
- ✓ Localized apps into 29+ languages with dynamic locale switching; titles collectively surpassed 1 million and 100,000+ downloads on the Google Play Store.

Projects

Jarvis - Personal AI Assistant Developer

- Integrated Claude (Anthropic) and OpenAI Codex via Telegram Bot API to create an autonomous personal AI assistant capable of task management, code generation, and context-aware conversations.
- Demonstrated production-level LLM API integration and prompt engineering

FinTruth - EMI & Tax Calculators Developer

- Built high-accuracy financial transparency app with complex compound-interest logic, amortisation schedules, and income-tax calculators.
- Monetised with Google AdMob rewarded and banner ads; achieved organic ranking in the Finance category through full ASO.

Hey Auto - Virtual Auto Stand Platform Developer

- Built subscription-based platform connecting Kerala auto-rickshaw drivers with passengers using Mapbox for real-time geo-tracking, route visualisation, and live driver-status updates.

Billing POS - Point of Sale Solution Developer

- Developed comprehensive Android POS for retail environments with barcode scanning, offline-first Room database, and Firebase Firestore cloud sync.

Smart Expense Tracker
Developer

- Built personal finance app with category-wise spend tracking, monthly budget alerts, and visual reports using Clean Architecture and DataStore for user preferences.

LifeOS-Habit & Life Tracker
Developer

- Designed daily and weekly habit tracker with streak visualisation, progress , reminders to build sustainable productivity routines.

Student TechHub-Kozhikode
Developer

- Building city-wide collaboration platform for CS students covering project matching, hackathon team formation, and shared resource discovery.

My Works

my works: <https://ashik-works.vercel.app>

Skills

- Kotlin & Java (Android)
 - Jetpack Compose (Material 3)
 - XML Views, DataBinding, ViewBinding
 - Kotlin Multiplatform (KMP)
 - MVVM, MVI, Clean Architecture
 - Hilt / Dagger 2 Dependency Injection
 - Retrofit, OkHttp, REST API
 - Integration Room Database &
 - DataStore
 - Kotlin Coroutines & Flow / StateFlow
 - CI/CD – GitHub Actions & Infisical
- Web Design – HTML, JavaScript,CSS
 - Firebase (Auth, Firestore, FCM, Analytics)
 - Google AdMob – Banner, Interstitial, Rewarded
 - Google Maps SDK & Mapbox
 - AI Dev Tools – Claude Code, Codex, Antigravity
 - Release Management Analytics – MixPanel, Firebase, Clarity
 - Agile / Scrum Methodology
 - R8 / ProGuard & Performance Optimisation
 - Play Store Publishing & Release

Education

2018 - 2021	BSC Computer Science University of Calicut
2016 - 2018	Higher Secondary Education Farook Higher Secondary School

Accomplishments

Certifications

Anthropic Claude AI Developer Certificate - Anthropic (2026)

Awards

BestAppTesterAward - BugBountyHackathon

Languages

English (Fluent), Malayalam (Native), Hindi (Conversational)
